**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**Field Code Jordan Township SchoolSITS# 32 AD**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room school on a poured concrete foundation. The gable roof of the main body of the school and the entry are covered with metal sheeting with metal capping on the school and finials. The soffits are closed. A red brick chimney sits at the north end of the building on the east slope near the peak. The building measures 36 feet north to south and 22 feet east to west. The entry measures 10 feet by 10 feet.

There is a wide trim board on the walls under the soffit at the peak ends of the school. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. The entry has 10 inch composite siding. The entry door is a combination storm door with another locked door inside. There are three double hung, two over two, windows on both the west and the east, all glass intact. The windows have half curtains and shades that pull from the top. The interior walls are wallboard and there is wainscot on the lower third. The ceiling is dropped with ceiling tiles. The floor in the shed is concrete with concrete steps up to the school entry door. The floor in the main body is tongue and groove. There is a blackboard on the entire north wall. Light fixtures and wiring suggest electricity. There are pews in the building suggesting that this building has been used as a church.
