**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Orange Township SchoolSITS# 32 AD**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a foundation of mixed rocks and concrete. The gable roof of the school and the shed roof of the entry are covered with older asphalt shingles. There is a short, red brick chimney at the north end of the peak of the roof. The soffits are closed. The building measures 32 feet north to south, inclusive of the entry, and 24 feet east to west.

There is a wide trim board under the soffits at the peak ends of the roof as well as under the soffits on the entry. The remainder of the siding is 6 inch woodlap with 4 inch wood corner trim, very little paint left. The locked 5 panel entry door is reached by wood steps to a wood platform porch, falling apart. There is a wooden railing along the south side of the porch. On the south wall of the entry, to either side of the door are two covered window openings. Two more covered window openings are on the east and west walls of the entry. On the north side of the school there are two replacement windows with intact glass, the top of what most likely was a taller window was filled in with siding. The east wall has two large covered areas that were likely large windows. The interior of the school, as viewed through a north window, shows wallboard on the walls and ceiling tiles. The floor is tongue and groove hardwood. Blackboards on the south wall of the school room, with a door at the east edge of the entry wall, and on the west wall.

A large fuel tank sits along the north wall. There are newer desks in the classroom. Playground equipment remains in the south yard. Light fixtures and outside conduit suggest electricity.
