**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**Field Code Hemen Township SchoolSITS# 32 BA**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete foundation. The gable roof of this school is covered with wood shakes and the peak is finishes with metal capping with finials. Many of the wood shakes are missing. there is a red brick chimney located at the west end of the school at the peak of the roof. The half hip roof of the entry is also covered with wood shakes with metal capping and a finial at the east end. The building measures 28 feet east to west and 18 feet north to south. The entry measures 8 feet by 8 feet.

The walls of the school begin with a wide trim board under the peak ends of the roof. The remainder of the siding is 6 inch wood lap with 4 inch corner trim again with a skirting board and water table to complete the bottom of the siding. Originally there were 6 dindows on both the north and south sides. The middle window on the south side was boarded up with siding and the left and right windows on the north side were filled in as well. The remaining windows appear to be original windows, double hung with some glass. There is one small, fixed pane window in the entry. The entry door to the school is a broken 5 panel wood door. There is a small concrete pad just approaching the door. The small entry allows access to the school room through a newer wood door. The walls ceiling in the school are lathe and plaster with some of the plaster falling away from the ceiling. The floor is tongue and groove hardwood. There is a small black board on the west wall of the school room and there is also a fuel oil stove at that end of the room. There is a fuel oil barrel outside the west end of the school and there is also one outhouse to the northwest of the school. An electric meter and conduit suggests the presence of electricity.
