**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Heimes Landing #1SITS# 32 BA**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete block foundation. This building was moved to this location to be used for a cabin. The gable roof of the building is covered with asphalt shingles and the addition to the lake side has metal sheeting. There is a short, concrete chimney at the north end of the gable. The building measures 36 feet north to south and 20 feet east to west minus the addition toward the lake. The entry, located at the south end of the building, measures 6 feet by 10 feet.

There is a wide trim board just under the peak ends of the roof with 6 inch wood lap and 6 inch wood corner trim to finish the wall. There windows are mostly replacements with two windows that could be original windows. There is also a slider in above the entry. The entry door is new with an exterior storm door. There is electricity. Little of the original remains inside the bulding.
