NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Heimes Landing #2SITS# 32 BA**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete block foundation. The concrete blocks are covered with metal sheeting. This building was moved to this location for use as a summer cabin. The roof of the building is covered with asphalt shingles. There is no chimney. The soffits are closed with beadboard. The building measures 36 feet north to south and 20 feet east to west.

The siding begins with a wide trim board just under the soffit on all sides. The siding continues with 6 inch wood lap with metal corner capping, all painted red. At the bottom of the exterior walls is a skirting board with water table. There is a concrete step leading to the solid core entry door, there is a half hip roof covering the porch. There are two windows on the south wall and one on the west, all replacement. Two more windows are at the north end and the south has another entry door and more windows and a sliding glass door.

We did not observe the interior. Electricity is present today.
