**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Heimes Landing #3SITS# 32 BA**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete foundation. The hip roof of this building is covered with asphalt shingles. There is no chimney. There is a dormer at the north end of the building with a small, 4 pane fixed window. There are eaves troughs on the roof and the soffits are closed with beadboard. The addition toward the lake is a screen porch on the lake side with a small shed addition at the north end of the porch. The building measures 36 feet north to south and 24 feet east to west without considering the porch.

A wide trim board runs on the buildings walls at the seam with the soffit. The remainder of the siding is 6 inch wood lap with metal corner capping. On the north side there is an entry door, newer, with windows to either side and they appear to be the original windows. Other windows on the west side are new double hung windows. On the east side the windows are large double hung and all original to the school. All glass is intact. In the main body of the building the walls and ceiling are lathe and plaster. The floor is tongue and groove hardwood. The blackboard remains on the south wall and there is wainscot. Electricity is also present.
