NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Dale Woburn SchoolSITS# 32 BK**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete block and wood foundation. The gable roof of both the school and entry are covered with asphalt shingles with metal capping and finials on the main body. There is no chimney and the soffits are closed. The building measures 42 feet east to west and 16 feet north to south, including the entry.

There is a wide trim board on the wall under the soffits at the peak ends of the school and entry. The remainder of the siding is 6 inch wood lap with 6 inch wood trim. The entry door is broken and the entry itself has been stripped of siding. The entry door into the school room is missing. There are three double hung, two over two, windows on the south side, some glass. A similar window in the middle of the east wall, and two on the north wall with one covered. The siding in the school is beadboard and the ceiling is wood sheeting (?thin plywood). The floor is tongue and groove hardwood. Light fixtures suggest electricity.
