**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Fay Township School #1SITS# 32 BK**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a wood foundation. The gable roof of the school and the shed roof of the addition are covered with asphalt shingles. There is a red brick chimney at the peak of the roof near the south end. The soffits are closed. The building measures 28 feet north to south and 20 feet east to west.

There is a wide trim board on the wall under the soffits at the peak ends of the school and entry. The remainder of the siding is 6 inch wood lap with 6 inch wood trim. A door with three wood panels on the lower third and a three vertical pane window on the top give entry to the coat room. A 5 panel wood door then goes into the school proper. The walls and ceiling are covered with wallboard. The floor is tongue and groove hardwood. All the windows are double hung, two over two with some glass missing. There are two windows on the north wall, either side of the door. Three windows are on the east side and three more on the west. The addition on the south side has a covered opening on the south wall and a small window on the west side. Light fixtures would suggest electricity. There are no blackboards left in the school and a refrigerator would suggest perhaps this was used for lodging.
