---

## FEATURE DATA

**1. Feature Description, Integrity, Eligibility:** The site consists of one building and a small wood-lined depression. The building was a school house, later used as a town hall. The building seems to be in good shape and relatively undisturbed. The proposed South Central Water pipeline is routed near to the building. Installation of the pipeline should avoid impacts to the site features.

# NDCRS ARCHITECTURAL SITE FORM

Field Code: UND-SCWD09-1

SITS#: 32 BL

---

## SITE DESCRIPTION

### 2. Owner's Contact Information:

3. **Access (rural areas):** From Menoken, ND, go south 6 miles. The building is on the east side of the road.

4. **Site Area (ft<sup>2</sup>):** 800 m<sup>2</sup>

5. **Site Description:** The site consists of a school building that was later used as a town hall. It currently is unoccupied. A small wood lined depression behind the building may have been an outhouse.

6. **Summary of All Site Features & Evaluation of Site Significance:** The site is unevaluated in terms of NRHP eligibility criteria. The building seems representative of rural school houses in North Dakota.

**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**Field Code \_\_\_\_\_ SITS# 32 BL \_\_\_\_\_**1. Feature Description, Integrity, Eligibility:**

The main body of feature one is a simple wood frame prairie school on a stone foundation. Some concrete appears to have been poured as an apron long ago and only chunks remain near the building. The east and west sides each have three two-over-two double hung windows while the north side opening was filled in. This opening appeared to have been a door but a large piece of plywood covered the bottom portion of the wall and that could not be verified. Wood lap siding covers the walls while asphalt shingles cover the roof; the chimney is chimney block and appears to date from when the roof was redone. On the south end of the building, an entrance a couple feet smaller than the main body has a modern screen door with a small replacement double-hung window on either side of the door. A wood flagpole extends upward from the peak at the front of this entrance. An old concrete pad with two concrete steps, newer than the pad, provide access to the entrance. Louvered vents exist under all three peaks and a light has been mounted above the entrance. Conduit on the outside of the building suggests this building did have electricity.

Recorded By Lorna Meidinger Date Recorded 7/22/2009

**NDCRS ARCHITECTURAL SITE FORM  
PAGE 4—SITE DESCRIPTION**

Field Code \_\_\_\_\_

SITS# 32 BL \_\_\_\_\_**Complete one Page 4 for the entire site.**

2. Owner's Contact Information:

3. Access (to rural areas):

From I-94, take the Menoken exit heading south along 158th Street SE for approximately seven miles to 62nd Avenue SE. The building is located at the northeast corner of this intersection.

4. Site Area (ft<sup>2</sup>): \_\_\_\_\_

5. Site Description:

To the west and south, grass extends to the road with a barb-wire fence posting it as private property. Just east of the building is a group of trees blocking the view of that side. A short ways north of the building is a large modern horse stable.

**NDCRS ARCHITECTURAL SITE FORM  
PAGE 5—SITE DESCRIPTION**

Field Code \_\_\_\_\_ SITS# 32 BL \_\_\_\_\_

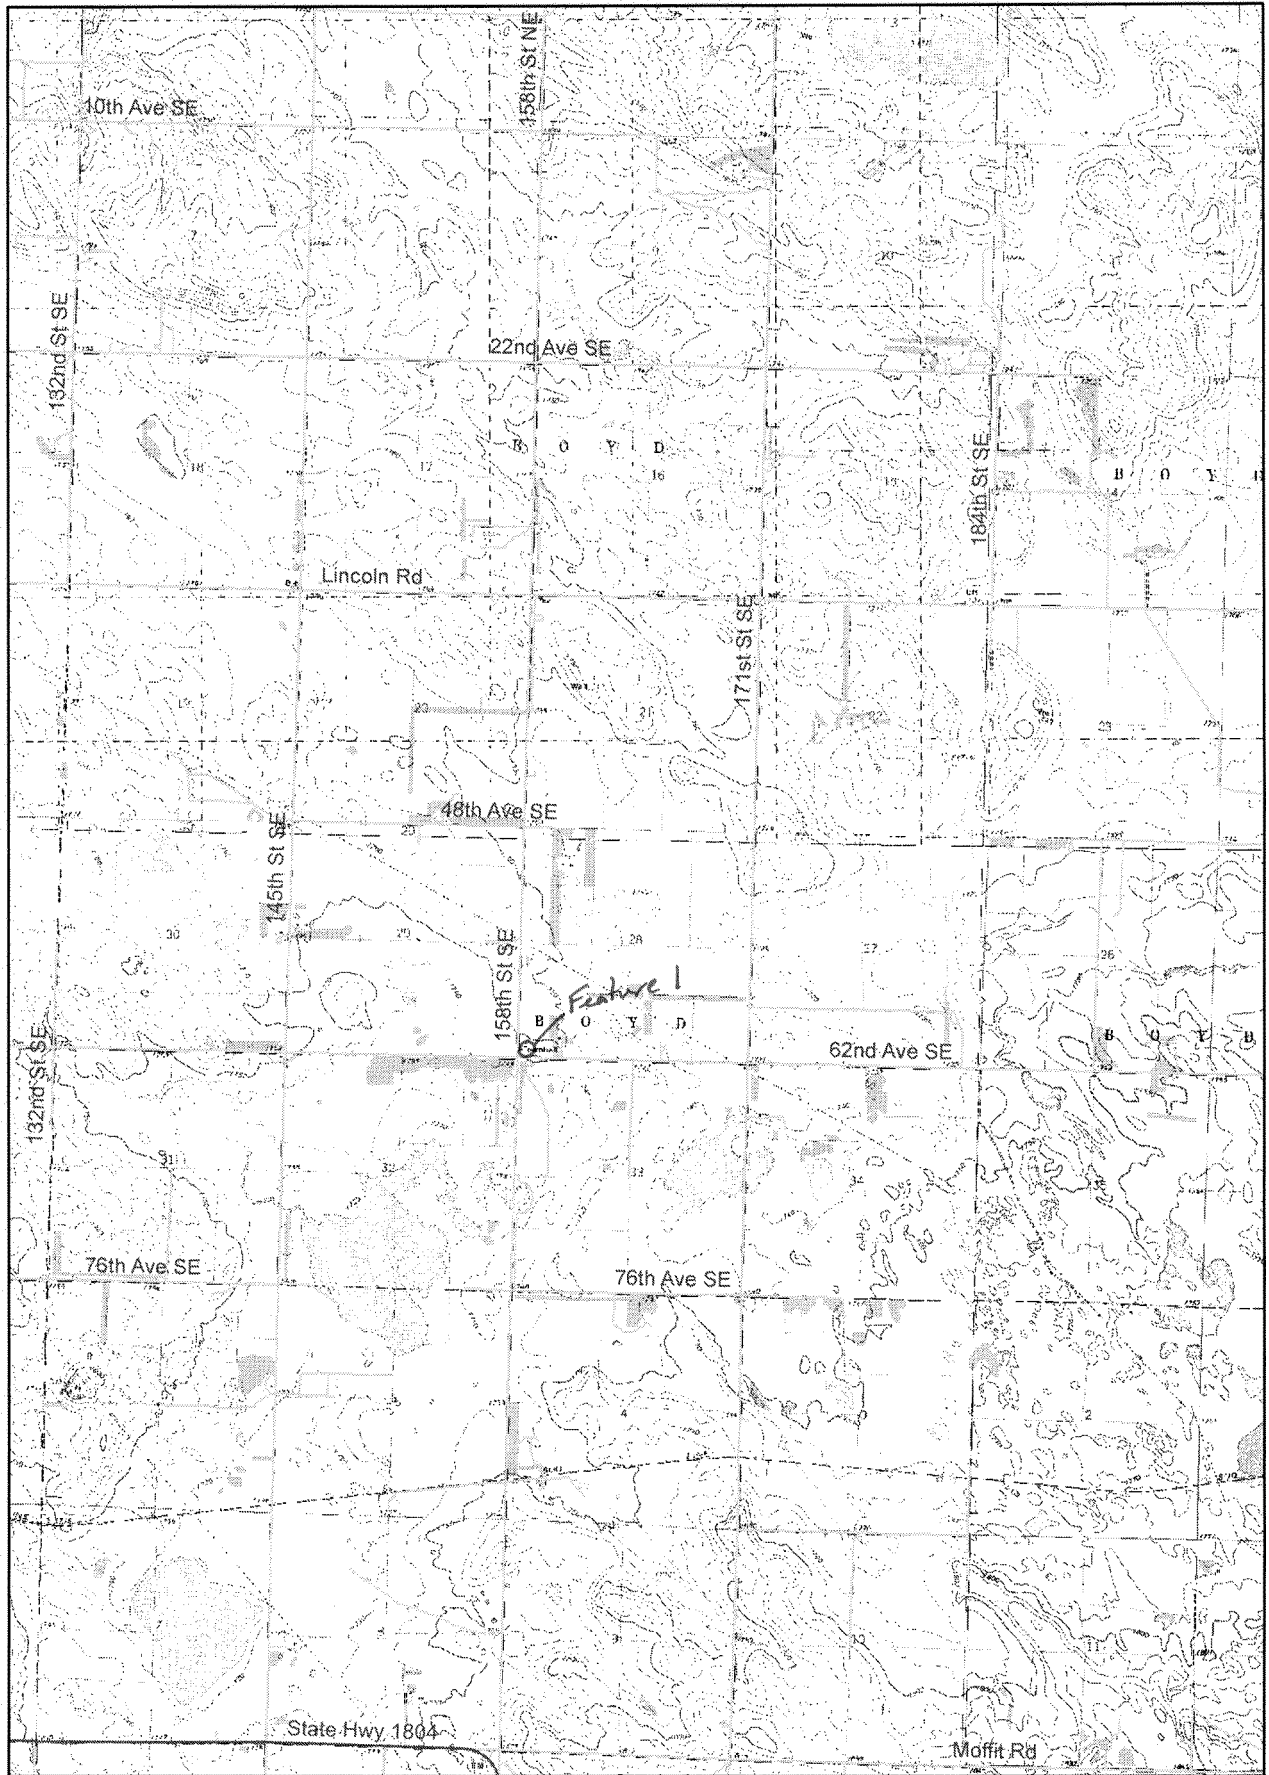

**6. Summary of All Site Features & Evaluation of Site Significance:**

This schoolhouse was moved at some point in time and there is talk about moving it again (information from Hobson Brown, Jr., neighbor). It also has replacement metal windows and a replacement metal entrance door. This building does not have sufficient integrity for an individual nomination but may meet the requirements for a thematic nomination since it appears to have been sited as it may originally have been and has relatively few material changes.
