**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Crofte Township SchoolSITS# 32 BL**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a poured concrete foundation. This school has wood shakes over wood sheathing. Metal corner caps cover all four peaks on the roof. There is a red brick chimney on the wester slope of the building. Wood shakes also cover the roof of each of the sheds, east and west. The eaves are enclosed with beadboard soffits wood facia.

Wide headers are under the eaves all four sides, in some sides there are two wide boards. Siding is 6 inch wood lap with 8 inch wood corner trim. The siding on the east, north and south walls is mostly intact with many of the lap siding boards missing on the west side. There are several openings on the building, a bank of three double hung windows to the south, covered and with glass, a door into the addition on the east side, covered with wood boards, a covered window there as well, two more openings are covered in the addition on the west side with yet one more window, covered, on the north wall at the east end of the school. There is a concrete set of steps leading to the door. Electricity was present in the school.

I did not go in to this building but could see that it was being used for storage.
