**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**

Field Code Chatfield township SchoolSITS# 32 BU**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The features is a one room prairie school on a concrete foundation. The gable roofs of the school and entry as well as the shed roof on the west addition are covered with asphalt shingles. There is a yellow brick chimney at the west end of the roof at the peak. The soffits are closed. The shed measures 10 feet east to west by 18 feet north to south, the main body of the school measures 28 feet east to west by 18 feet north to south and the entry measures 8 feet east to west by 10 feet north to south.

There is a wide trim board under the soffits at the peak ends of the school. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim with the exception of the shed and here there is metal corner caps. The entry is reached from a concrete step, the 5 panel door is broken and standing open. The entry ceiling is missing while the ceiling in the main school room is beadboard. The floor is tongue and groove hardwood. The walls in the interior of the school are a mixture of lathe and plaster and wallboard with sheet rock filling some of the window opening. There is beadboard wainscot. The school originally had three double hung, two over two, windows on both the north and south walls but 4 of the six have been either shuttered or filled in with siding. The north wall has no windows visible today and the south wall has two and the glass is intact. There is a small boarded up opening on the south side of the shed that might have been used for fuel. There is also a window opening on the north side of the shed, no glass. There are two doors leading into the shed from the main school room, one 5 panel door is intact. There is a blackboard on that west wall is between these two door. An old fuel oil stove sits near the west end of the school room. Light fixtures and wiring on the outside of the school suggest electricity.
