**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Cordeilia Township HallSITS# 32 BU**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The building serves as a township meeting hall today. The gable roof of the school, entry, and small porch overhang are covered with asphalt shingles. The roofing is in pretty tough shape. There is a concrete block chimney near the east end at the peak of the roof. The soffits are closed. The building measures 24 feet east to west and 18 feet north to south with the entry measuring 12 feet north to south by 6 feet east to west.

The siding on this school is stucco. There is a small, double hung window on the west wall of the entry and a locked 5 panel wood door giving entry from a concrete step. A bank of 6 multipane, double hung windows on the south side has all glass intact. On the east side of the school are two more multipane, double hung windows. The interior walls and ceiling are wallboard. The floor is wide hardwood. There are chairs and a small table inside the building as well as a furnace near the east wall. Blackboards are either side of the 5 panel wood door that comes in from the entry. Another small blackboard is on the north 1/2 of the the east wall. Light switches, outlets and fixtures suggest electricity.
