## 1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school moved to this current location to be used as a garage. It is sitting on a concrete pad. The gable roof of the entry and school are covered with wood shakes with metal capping and finials. The chimney is gone. The soffits are closed.

A rake board begins the siding under the eaves at the peak ends. The rest of the siding is 6 wood lap with 6 inch vertical wood corner trim. There is an entry at the south end of the school with a 5 panel wood door. One double hung window is located on the east wall of the entry, glass is intact. Four windows used to be located on the east wall of the school. All window openings were filled in and a new, solid core door was installed along with one newer double hung window. The interior of the building was gutted. Wiring near the entry door indicates electricity. On the north end of the school an overhead garage door was installed.
