## 1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school on a concrete block and wood foundation. It was moved to this location for use as a home and later a wood working shop. The gable roof of the school proper is covered with wood shakes with metal capping and finials. The shed roof of the entry was redone and covered with asphalt shingles. The original chimney was removed and a new, metal chimney replaced it. The school measures 18 feet by 24 feet. The soffits are closed.

The siding begins with a rake board under the peak ends of the school. The remainder of the siding is 6 inch wood lap with wood corner trim. This school is painted blue. There are three double hung windows on the east side, two of them are covered. On the west side two double hung windows remain while a third was removed to install a sliding shop door. The glass in all windows is intact. The entry door was replaced and a screen door was added. The floor is tongue and groove. The walls and ceiling are finished with beadboard. The black boards have been removed and there is electricity.

This school is the original Hilton School District #10, School No. 1. As the population increased a larger school was built to replace it and was named No. 1 and the old one was then called School No. 5. It closed in 1935 at which point it was sold and moved.
