Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
Contributes to a potential district
No nomination potential
Will not contribute to a district
Potential district—feature would be a contributing element if other properties constitute a district
Thematic nomination potential
Component of a historic site or landscape
Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
Historical associations require further investigation

Recorded By Lorna Meidinger Date Recorded 9/16/2010
(First Name & Last Name) (mm/dd/year)

Instructions to complete a digital version of this form: (1) Download a copy to your hard drive; (2) Open the saved blank copy; (3) Fill out the form; (4) Use the Save As command to rename the form appropriately and save; (5) Print and submit to SHSND.

Page 2

1. **Access** Drive west from Enderlin on ND 46 2 miles. Turn north on the county road and drive 2 miles. The school house is on the west side of the road and road intersection.

2. **Description of Site** This site is the site of an old one room school house. The school house is made of wood which has been stuccoed over and painted white on the outside. The foundation is of concrete and the building has a basement. The front entry faces east and has 6 concrete stairs leading up to it. Above the small entry is a bell tower (with no bell) topped with a flag pole. The rectangular building has windows on all sides. There are two basement windows, which have been boarded over, on each side except the south side, which has three. The front or east side has a window on each side of the entry. There are 4 windows on the south side and the back or west side has one large window across the back. The north wall has a window near the front, then a door (to the basement?). All the windows and the secondary door have been covered over with plywood. The roof has green asphalt roofing shingles with 2 metal stove pipes and a brick chimney on the south end.

[See Continuation Sheet]

3. **Description of Cultural Materials (quantify and identify)** Found inside the school building were 2 tables, 18 chairs, 1 bed spring, 1 chest, 1 bench, 1 lawn mower, 2 toilets, 2 shovels, 20 old text books, and 4 garbage cans. Outside the door was a broken bat. In the trash pile northwest of the building were 3 horsedrawn (?) farm machines, 4 rolls of fencing, 1 washing machine, 9 drain pipes, 1 water trough, 1 wheel barrel, and 1 trash barrel.

73 # of items of cultural material observed

0 # collected

4. **Artifact Repository** N/A

5. **Description of Subsurface Testing** none

Continuation Sheet

SITS Number _____

2. **Description of Site** Inside the main entry to each side is a pit toilet/bathroom. Also to the right, inside the entry is a door to the basement stairs. The main room is located directly west (forward) of the entry. This is a large room with blackboards on the north and east walls. The back (west) wall once had windows. In the southeast corner of the main room is a storage/furnace room. The floors are of wood. Doors and molding are unpainted wood while the walls are plastered and painted.

The building has electricity still and, judging from recent messages on the blackboard, is still used for local meetings and reunions. The door is not locked but wedged shut. The outside "lawn" is not mowed and fields run along the south and west edges of the "schoolyard." The area of trash and machinery to the northwest of the school building is probably related to farming activities in these fields. A small concrete base, 50 x 50 cm, is located in the overgrown grass north of the school building (function unknown).
