SITS# 32

Complete a Page 3 for each feature.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school sitting on a foundation of a mixture of concrete blocks and rocks. The gable roof of the main part of the building and the half hip roof of the entry are covered with asphalt shingles and the only thing on the roof is a small vent pipe. The chimney is gone. The soffits are closed.

The siding was replaced with vinyl. There are two windows either side of the entry that have 4 panes and are fixed. On the south side there are two newer, multipane windows with intact glass. There is also an opening that may have been used as a doorway, now covered with vinyl. One more small, double hung window is on the west wall. The entry has a newer entry door. The floor is tiled, likely over tongue and groove hardwood. The walls are lathe and plaster with some sheet rock used for room dividers. The school was converted to a house to be used when the original owners were in the process of building a new home at the farm site. There are no blackboards or wainscot. Old globe lights hand in the building, indicating electricity.

Church was held at the school until 1887 when Osterdale Lutheran Church was built.
