1. Feature Description, Integrity, Eligibility:

The large portion of the residence is two stories tall and one room deep with a 2 over 2 window centered on each floor of the gable end. The walls are covered with rolled asphalt in a coursed rock pattern. A one story addition extends at a right angle under a gable roof. A simple board trims the eaves and poles are visible in the overhang of the roof. A wood porch is attached to the one story portion and extends to the edge of the two story portion. The porch has an opening the size of a walk door near the two story portion and then five openings with partial wood sash and no glass. The gable end of this addition has a 2 over 2 window. Part of another feature is visible beyond the one story addition that has the same asphalt siding and appears to have a gable roof. Not enough is seen of this feature to record it.

Further research is needed to make a determination of eligibility.

Field Code _____ SITS# 32 CV _____

1. Feature Description, Integrity, Eligibility:

The log school operated from 1895-1921 when it was moved to the Frogne Homestead to be used as a blacksmith shop. There are two 2 over 2 double hung windows on each side and two 2 over 3 windows under the gable on the visible end. The roof has a steep pitch and appears to have wood siding from the roofline to the peak. A double wood door is off center on the end.

Further research is needed to make a determination of eligibility.
