**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code North Olga Township SchoolSITS# 32 CV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The hip roof of the main body and the gable roof of the entry have wood shakes with metal capping. A crumbling yellow brick chimney is on the south slope of the roof. The soffits are closed.

There is a wide trim board under the soffits on all side of the school. The remaining siding is 6 inch wood lap with 6 inch wood corner trim. On the west side there are two double hung windows with some framing and no glass. The north side is nearly gone, the lower wall is completely gone and some of the supports between windows are left hanging, there is a bit of framing in one opening and wide open spaces. Two window openings are either side of the entry door, these windows and interior door openings have decorative cornices. The entry door is missing. There is a transom opening above the entry door. A concrete porch leads to that entry. Entry walls are a mixture of lathe and plaster and beadboard and beadboard wainscot. One 5 panel wood door leads into one of the coatrooms. Entry into the school room is through doors from the coatrooms. Directly in the middle of the coatroom doors is a built in bookcase and there is a transom above the bookcase. The floor is tongue and groove hardwood. The interior school room walls and ceiling are covered with lather and plaster and weather is wearing that away. Wainscot on all the school room walls. No blackboards remain.
