**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Hay Township SchoolSITS# 32 CV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The hip roof and small gable bumpout on the south roof slope are covered with wood shakes with metal capping and finials. The soffits are closed. The chimney was located on the gable roofed bumpout and has fallen into the school. The building measures 24 feet north to south and 28 feet east to west.

A wide trim board is located under the soffits on all sides of the school. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. An outline on the south wall shows where an entry used to be and the entry is in a heap at the door opening. There is one double hung, four over four, covered window on the west side, another on the east, partly covered. On the north side there is a bank of 5 similar windows, partially covered. There is some glass. The interior walls and ceiling are covered with lathe and plaster with wainscot on all walls. The plaster is falling away from the ceiling and walls. No blackboard remains. The floor is tongue and groove hardwood and there are many holes. No evidence of electricity.
