PAGE 3—Feature Data**Field Code German Township SchoolSITS# 32 DI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

This features is a simple, wood framed one room prairie school on a concrete foundation. The roof is covered with wood shakes, most of them still hanging on. There is a yellow brick chimney near the north end of the peaked roof. Metal capping runs along the peak with ball finials at either end. The overhang has open soffits.

Under the eaves at the peaked ends is a wide header with 8 inch wide composite lap siding with metal corner trim. A concrete step leads to the entry. The door is old wood with a covered transom above it. There are three windows on the east, two are replaced, newer double hung windows. Three windows on the west are 2 pane, double hung. Some have glass missing and others are covered. The interior walls of the main body of the school are mostly paneled with areas of wainscot and other areas where it obviously was removed. The ceiling is pressed board. The floor is hardwood tongue and groove. No evidence of a blackboard. There is an old oil burning stove inside the school. A small entry is just inside the entry with a second door straight in. A light fixture above the door and others inside along with the wires running up the south wall give evidence of electricity.
