Complete a Page 3 for each feature.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school that was more recently used as a townhall. It is sitting on a concrete foundation in a pasture. The gable roof is covered with wood shakes, most of them still on the roof. There is metal capping at the peak of the roof with finials. There is a red brick, covered with stucco, chimney with part of the top falling away. The soffits are all closed. The building measures 30 1/2 feet north to south and 18 feet east to west.

There is a wide trim board under the peak of the roof at both ends with 6 inch wood lap siding and 4 inch corner trim. There is not much paint left on the school. There are three window openings on the east side of the school with no glass and a little window framing. Two more window openings on the north side of the school, one window at the southeast corner and the door opening on the east wall. The door is a broken, 5 panel wood door that leads into a coatroom. The southwest corner has a small fuel room with one small window facing to the west.

The walls and ceiling of the school are beadboard with tongue and groove hard wood floor. There is a small blackboard on the north side of the west wall. Electricity was present as indicated by light fixtures in the building as well as a light switch at the door.
