**Feature Preservation Recommendation(s) (Check all that apply):**

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**

Field Code Frazier Township SchoolSITS# 32 DV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The gable roof of the main body and the entry are covered with ribbed metal sheeting. The soffits are closed. There is a newer red brick chimney on the west slope. The building measures 28 feet north to south and 20 feet east to west with the gable entry with the salt box line roof to cover the porch measures 12 feet by 8 feet.

A wide trim board begins the exterior siding just under the soffits of the peaks. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. The school has very good paint. There is post supporting the porch roof at the northeast corner. A concrete stoop leads to a 5 panel wood door going into the entry. The entry walls are covered with beadboard. At the south half of the entry are two toilets. Each small room has a fixed pane window. There are two double hung, two over two, windows on the east wall of the entry with a decorative fan window above them. There are 4 double hung, two over two, windows on the south side as well as the west side and only one is shuttered. All the glass is intact. The interior walls of the school are covered with lathe and plaster and there is wainscot. The high ceiling is lathe and plaster as well with schoolhouse globe fixtures. There is a furnace near the north wall of the school. Blackboards are on the east wall from the entry door to the north wall and around the corner and about half way across the north wall. Those light fixtures and exterior wiring with a meter holder suggest electricity.
