**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Elkhorn Township School #3SITS# 32 DV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a foundation of rocks and concrete. The building looks to be two separate buildings put together from the outside but the inside looks like one school room. The gable roof is covered with wood shakes. The soffits are closed. There is a red brick chimney at the peak in the middle of the the south part of the building. The building measures 32 feet north to south and 12 feet east to west.

There siding is ship lap with 6 inch wood corner trim. There is a have circle set of concrete steps up to a concrete stoop that lead up to the 5 panel wood entry door. Inside the entry is a coat room to the right and two toilets to the left, vents can be seen on the outside of the entry wall on the west side. Again you step through another wood door into the school proper. Walls in the school room as well as the entry are all covered with wall board. Sheets of wallboard or fiberboard were used for the ceiling and much of that has fallen in. There are two double hung windows at the north end of the room, four more, in some cases three vertical pane, windows on the east wall as well as one on the west side, all with little framing and little glass. The floor is tongue and groove pine. No blackboards remain in the school. Light fixtures and a switch suggest electricity.
