NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data

Field Code Lincoln Valley Twsp SchoolSITS# 32 DV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a large prairie school on a poured concrete basement. I suspect this is more than a one room school. The hip roof of the main body, the gable roof of the entry as well as the pyramidal roof of the bell tower all have wood shakes with metal capping. There are rain gutters at the bottom of the walls with downspouts. There is a new, metal chimney pipe on the south slope of the school roof. There is a bell tower at the peak of the entry. The base appears to be an extension of the roof, wood shakes go up the sides to the base that holds the four corner posts. The posts continue up to support the roof and at each of the openings there is a decorative curved piece of wood near the top to finish each opening. There is no bell.

There is a wide trim board under the soffits on all side of the school. Remaining siding is 6 inch wood lap with metal corner capping finished with waterboard and a skirting board. There is a wood step leading up to a wooden stoop with pipe railings on each side. The building has many boarded up windows, 6 on the west side, 5 on the north side and 6 on the south side with 2 either side of the entry and two on the south wall of the entry either side of the door. Above the door is a round window opening that is boarded shut. There door is two pieces of plywood to cover the large opening and it is padlocked shut. There is a space above that door that would have been a transom, also boarded over. The lower level of the building has several windows as well, 6 double hung windows on the west side, 6 on the east side and two on each side of the entry.

There is an outhouse sitting to the northeast of the school.
