**Feature Preservation Recommendation(s) (Check all that apply):**

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

### NDCRS ARCHITECTURAL SITE FORM

#### PAGE 3—Feature Data

Field Code

SITS# 32

**Complete a Page 3 for each feature.**

**1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school building on a foundation of poured concrete. The original location of the building is unknown. It was first moved next door to a church in the 1940's and a tunnel connected the school to the church. In 1954 it was moved to the current location. Today this building is used for AA meetings.

The roof of the building has newer asphalt shingles. A concrete chimney sits at the peak of the roof of the main building of the school. Heat is fuel oil and they heat the building today. The soffits are open.

A rake board begins the siding which is 6 inch wood lap with 4 inch wood corner trim. The owners have recently repainted most of the building. There are two fixed pane windows on the east side as well as a door near the southeast corner. It does not look like they use this door. On the west wall near the south side there is a large multipane, fixed glass window. There is one older double hung window with glass on the west wall of the entry. A small arched window is located just under the peak on the west wall of the entry. At some point there was an addition put on the north end of the building, this area does not appear to be used as the carpet is old and the paint is coming off the walls. There are three double hung windows in the addition, one on the east wall, another on the north and yet a third on the west. There is a 5 panel wood door at the north end of the west wall of the addition. The walls in the interior of the school building are sheet rock today. The ceiling is finished with ceiling tiles and there is a vent in the middle of the room. The floor is hard wood and there is wainscot on three of the walls. They have added a small kitchenette to the left as you walk through a 5 panel wood door into the school room proper. There is a small bathroom in the entry, straight in from the 5 panel wood entry door. Another small bathroom is off the addition. There is electricity as shown by light fixtures and exterior wires. There are two blackboard either side of a cork board on the south wall.
