Complete one Page 3 for *each* architectural feature at the site.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school on a concrete foundation. The school was relocated to this farm site. The roof is covered with wood shakes with some metal capping and finials remaining. The soffits are closed. There is no chimney, a hole at the south end of the school roof shows where it was. Remains of a bell tower can be seen on the peak of the entry.

A rake board begins the siding under the peaks of the roof with 6 inch wood lap and 4 inch wood corner trim continuing down to a waterboard. There are three sets of three window openings on the west side of the school with many of the openings covered. No glass in any of the windows. The column that would have supported the entry roof extension is missing. The door opening has no visible door. The entry has a small, square window opening under the peak of the roof, another square opening to the left of a double hung window opening, mostly covered. Two more small, square window openings are on the south side of the bathroom addition. There is a blackboard on the east wall. No evidence of electricity. Entrance was not attempted.

4. Description of Access and Site Setting:

Access to this school would be from Hwy 5 about 5 miles east of Crosby. At 113th Ave NW you would go north 4 3/4 miles to see a long driveway to your left (west). The school is located on the west side of the house, south side of the driveway.

The school is located on a farm with bins and buildings to the northwest, more buildings to the north. Trees around a house is directly east with farm fields all directions.
