Instructions to complete a digital version of this form: (1) Download a copy to your hard drive; (2) Open the saved blank copy; (3) Fill out the form; (4) Use the Save As command to rename the form appropriately and save; (5) Print and submit to SHSND.

**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**

Field Code Eddy County Museum

SITS# 32 ED

**1. Feature Description, Integrity, Eligibility:**

This school appears to have been built after July, 1987 , as that is when Superior school district was formed. This building was moved to its present location late 1960's. This rectangular, wood framed school building is in good condition. The siding is wood lap and has been kept in good repair. It looks to have been recently painted. The roof has asphalt shingles and eaves troughs have been installed to protect the building. There is a modern screen door as well as a wood door at the entry. Entry is gained by way of a concrete ramp to a concrete step. There is a metal railing along the walk away and step. The front of the school has two windows, one either side of the door as well as a transom window over the door. The top 1/3 of the north side of the building has scalloped, decorative siding. Additionally there is another open-work trim piece that is a triangular shape near the peak. On the roof you can see there is a bell town in very good shape. Also has a bell in it! The building measures 32 feet long by 20 feet 5 inches wide.

There is a light fixture over the entry door indicating electricity was or is present in the building. On the east side of the school a water spigot is seen, at some point they added water to the building. There is a bathroom to the left as you enter the school and I believe that is why water was added to the building. To the left of the bathroom is a coat closet.

The school is used for museum displays.
