PAGE 3 – Feature Data**Field Code** Alkali Creek Township School**SITS#** 32 **EM** 876**Complete one Page 3 for each architectural feature at the site.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The gable roof of the school and entry are covered with wood shakes with metal capping and finials. There is a concrete chimney with a metal flue at the west end of the peak of the roof. The soffits are closed.

A rake board begins the siding on the peak ends of the school. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. There is an entry on the east side of the school with a south facing door. A small window faces east from the entry. On the south side there are 5 double hung windows with glass, four similar windows are on the west side. I did not get into this school. Electrical wires to the school would indicate the presence of electricity.
