SITS#: 32 EM 911**Comments:**

Site 32EM911 was previously recorded in 1989 as a school building with a wood frame and wooden horizontal siding. The site was revisited in 2010 by UND researchers during the conduct of a rural water pipeline survey project. The school building was found to be no longer standing. The site area contains pieces of foundation, but the superstructure is entirely gone. Scattered cultural materials include bricks, mortar, coal, bits of flat glass, curved glass, whiteware, and a metal jar lid. In 2010, the site area was within an actively plowed field.

A main transmission line for the Emmons County Rural Water Project passes through the site area, but no further work is recommended for the site, due to dismantling/moving/razing of the building, and because of plowing impacts to the general area.
