Miscellaneous Information _____

Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, and spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

PAGE 3 – Feature DataField Code Braddock ThreshersSITS# 32 EMComplete one Page 3 for *each* architectural feature at the site.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school on a concrete foundation. The hip roof is covered with asphalt shingles. There is no chimney. Soffits are closed. The school measures 22 feet north to south and 18 feet east to west.

The siding begins with a rake board on all four side of the school. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. There is a two panel wood door that gives entry from a wood porch. To either side of the entry door are new fixed pane windows. The south side has three new windows with two double hung and one fixed pane. Two more fixed pane windows are on the east side. The windows fill the size of the original openings and there are decorative cornices at the top of the windows inside. You step into an entry area just inside the door and there is a coatroom to the right. Another small room to the left is reached from the school room, not the entry. The walls of the two small rooms go up 8 feet and are open across the top into the school room. There is wainscot throughout. Wallboard finishes the walls and ceiling. Blackboards are located along the length of the north wall that corners around to the east wall up to the north most window. There is a smaller blackboard at the southeast corner from the east window to the first of the south windows. The floor is tongue and groove hardwood. Light fixtures would indicate electricity was present at some point.

The school was moved to the threshing grounds in 1984.

2. Owner's Contact Information:

4. Description of Access and Site Setting:

This school is part of a cluster of buildings on the north side of Braddock. It is a threshers association ground. The school is just to the west of 16th Ave SE as you go out of Braddock to the north. Other buildings of the threshing grounds are seen near the school.

5. Summary of ALL Site Features and Evaluation of Significance:
