Roof/Cornice Gable, hip entry

Window Double hung, some with screens

Dating Method(s) Estimate

Miscellaneous Information _____

Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, and spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

NDCRS ARCHITECTURAL FORM
PAGE 3 – Feature Data**Field Code** Baumgartner School**SITS#** 32 EM**Complete one Page 3 for each architectural feature at the site.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room school on a concrete foundation. It was moved to this farm yard for use as a garage. The gable roof of the school and hip roof of the entry are covered with wood shakes. The soffits are closed. There is a short brick chimney with a flue at the north end of the peak.

The siding begins with a rake board under the eaves at the peak end of the school as well as all side of the entry. Most of the rest of the siding is wood lap with 4 inch wood corner trim. On the north end of the school, above the windows, the siding is wood shakes. This was obviously the front of the school as the entry is also facing north. There are four double hung windows on the east side, some with screens. Two more double hung windows are on the north side. The entry has one small fixed pane window facing south and another facing west. There is an overhead door on the south side. The interior walls and angled ceiling are finished with wallborad. There is a picture rail on some of the walls. The floor of the building is tongue and groove hardwood. On the west wall of the school there is a book case to the right of the door coming from the entry. To the north of the door there is a blackboard. Another small blackboard is located on the east wall near the overhead door. The entry is on the west side of the school with a 5 panel wood door for access. There is an overhanging roof supported by a corner post for the wood porch. Light fixtures indicate electricity was present at some point.
