ARCHITECTURAL SIGNIFICANCE

- Work of Master
- High Artistic Values
- Rep. of type, period, method of construction
- Visual Landmark
- Too new to be elig.
- Lacking integrity
- Not High Style

HISTORICAL SIGNIFICANCE

- Associated with significant person
- Associated with significant event
- Associated with development of locality

FEATURE DESCRIPTION This feature is noted on the USGS topographic map as "townhall". It is probably the meeting place for the township of Inkster. Adjacent to this building (in what is probably the parking lot, in the cultivated field adjacent to the bldg) is a historic trash scatter that appears to represent a household dump. It is summarized on the accompanying archaeological-historical site form.

OTHER HISTORICAL INFORMATION Many of these townhalls were once rural schools. This possibility and the possibility that this is not the original location of this building, should be researched.

COMMENTS/REFERENCES

1. Access: From Inkster, North Dakota, travel 3 miles west on Grand Forks County Road #1. The township hall and cultural material scatter are located in the northeast corner of this intersection.

2. Description of Site: This site consists of a dense scatter of cultural material that appears to represent a household dump. It is located adjacent to the Inkster township hall in what appears to be the parking lot. The site apparently extends into the cultivated field to the east and north of the township hall, but the visibility was poor at the time of our survey and did not allow us to delimit the boundaries of the site accurately. An architectural form has also been filled out on the townhall portion of the this site.

3. Description of Cultural Materials: Cultural materials included china, glass, leather, metal, crockery, limestone foundation slabs and brick. Some of the glass and other materials appear to have been burned.

Items: See map and map legend.

Collected: Artifactual material thought to be temporally diagnostic.

4. Artifact Repository Collected materials will be returned to the land owners

5. Description of Subsurface Testing none on this project.

6. Current Use of Site: Inkster Township hall and a cultivated field.

7. Owner's Name/Address: Forest River Community of the Hutterian Brethern, Fordville, North Dakota.

8. Vegetation: Cultivated field, some grasses and forbs in front of township hall and in road ditch.

9. Cover (% of visible ground): Varied (see site description).

10. Man-hours spent on site: 3

11. Project Title/P.I. 1985 Forest River Archaeological Survey
Thomas K. Larson

12. Report Title/Author 1985 Forest River Archaeological Survey
Larson et al.

13. Other Published References: none

14. Description of Collections Observed: none

15. Owner-Address of Collections Observed: N/A

Field Number: LT237

SITS Number

16. Statement of Integrity: The dense scatter of artifactual material may indicate the presence of a subsurface deposit of household items. These may be the result of an earlier use of the townhall or an earlier building on the site. The integrity of the site cannot be determined without testing and an archival search.

17. Statement of Significance: Testing within the concentration and a title and archival research should be completed before a statement of significance is made.
