Page 2

1. **Access** Leave Cooperstown driving east on highway 200. Drive 4.5 miles from the east edge of town. Turn north on the first gravel road east of the bridge crossing the Sheyenne River. Drive north for approximately 2.5 miles. The school is very close to the western edge of the road.

2. **Description of Site** Oak Grove School is a wood-frame structure with a shingled, hip roof. The chimney is located in the center front of the roof behind a small dormer window which provides access to the roof-top flag pole. The building is 1 complete story with an attic and a concrete-block basement. The only door is in the east side and is accessed by a concrete stoop. There are 2 windows and a transom on the east side and 7 windows on the south side. All are boarded over. No windows are on the north or west side. Jerome Arneson, a local landowner, told us that the building was originally built on the east side of the road, facing west. He said it was turned around so that the windows would face south rather than north for heating practicality.

3. **Description of Cultural Materials (quantify and identify)** not applicable

N/A # of items of cultural material observed N/A # collected

4. **Artifact Repository** N/A

5. **Description of Subsurface Testing** N/A
