NDCRS ARCHITECTURAL SITE FORM PAGE 3—Feature Data

Field	Code Binford School	SITS# 32 GG	

Complete a Page 3 for each feature.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school on a foundation of railroad ties. This building is in the city of Binford and appears to be in use as a small museum. The roof is covered with asphalt shingles with metal ridge capping and finials. The chimney is gone. A wide header runs under the eaves at the peak ends of the school. The siding is 6 inch wood lap with 4 inch wood corner trim. The soffits on the east and west sides are open. There is a plywood porch that gives entry to the school through a 5 panel, broken wood door with a transom above it. A small entry gives way to the main body of the school. There is a small room that goes from the entry to the east wall that might have been used for storage or perhaps it was a coat room. The walls of the building are covered with a wallboard, painted to resembel wainscot on the bottom third and a lighter color above that with a row of ceiling tile to finish and run right into the ceiling. Light fixtures show electricity was present at some point. The floor int he building is hardwood. Two windows on the south wall are newer, double hung. Four double hung windows are on the west wall, intact glass and shades at the mid point. Another double hung window and one small fixed pane window are seen on the north wall. There are blackboard in the school but I don't think they were original. One blackboard has "Binford Public School" printed on it in chalk.
