**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Hobson SchoolSITS# 32 GT**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school that has been moved to its present location. The building is bowing inspite of ties that hold the north and south walls together. The building measures 28 feet east to west and 18 feet north to south. The entry measures 10 feet east to west by 8 feet 2 inches north to south. The roof is covered with shakes with a metal ridge cap on both the school and entry. There is a decorative soffit that curls around at the corners of the roof as it comes around to the peak ends of the school as well as the entry. A wide trim board runs just under the soffit at the peak ends of the school. The siding is 6 inch lap with 4 inch corner trim boards. There is a door at the east end of the school and that east wall has siding falling off in places. The south wall has 6 double hung windows with glass missing and much of the frame work for the windows as well. One window is boarded over. There are two windows facing west, also without glass. The entry has a small, boarded up window to the west and the 5 panel wood door opens to the south. The interior of the school is very tired with a bowing wall on the south. There is wainscoting inside and lather and plaster on the walls and ceiling. A lot of the plaster has fallen away from the lathe and there is much missing in the ceiling. Blackboards used to hang on the north wall. The floor is tongue and groove hardwood.
