**Feature Preservation Recommendation(s) (Check all that apply):**

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**

Field Code Clark SchoolSITS# 32 GV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. It is completely clad in metal from roof to all walls. There is a large, overhead door on the south side for entry with vehicles and a newer entry door with glass on the top half. The building measures 26 feet north to south and 24 feet east to west with the entry measuring 8 by 10 feet.

There are no visible windows other than the entry door. Inside the entry and into the school there is a wall on the right side that makes a hallway into the rest of the building. The old beadboard ceiling has been retained in this portion of the building. There is a mixture of wallboard and beadboard on the west wall. Also visible on the west wall are three large, double hung windows with some glass, all covered from the outside. There is tongue and groove flooring in this part as well. The remainder of the building has wood panels on the wall and wallboard panels on the ceiling. No evidence of blackboards or wainscot. Light fixtures suggest electricity. The building is used for shop/storage and as a garage today.

This school was built in 1909, burned down and was rebuilt in 1915 and operated until 1953
