**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Owens SchoolSITS# 32 GV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a foundation of rocks. The gable roof of the main body and the entry are partially covered with wood shakes. Much of the roof planking is visible. A bit of metal capping remains with one finial. There is a red brick chimney at the peak at the west end of the roof. The soffits are closed. The building measures 16 feet north to south 32 feet east to west.

There is a wide trim board on the exterior wall under the soffits on the peak ends of the roof. The remaining siding is 6 inch wood lap with 6 inch wood corner trim. There are several windows of different sizes, all covered. On the west end there is a high window which suggests a loft or second story, three large window openings on the north side, two more on the south side, I suspect the wood door on the south side, between the two windows was once a window as well. Another smaller window is high over the plywood door on the east end of the entry. There is another 5 panel wood door on the south wall of the entry. The doors were locked. The building served as a house for several years.

The school was built in 1909 and operated until 1935.
