**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Weinreis SchoolSITS# 32 GV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. It was moved to this location for use as a shop. The gable roof of the main body and the half hip of the entry are covered with asphalt shingles. There is a short, cement chimney at the peak near the north end. The soffits are closed. The building measures 24 feet east to west and 16 feet north to south, inclusive of the entry/porch.

There is a wide trim board on the exterior wall under the soffits on the peak ends of the roof. The remaining siding is 6 inch wood lap with 4 inch wood corner trim. There is a bank of 6 newer double hung windows, with storms, on the north wall of the building. Another small window is on the west side of the entry. Half of the entry is an wood floored open porch with one column for support at the northwest corner. The porch leads to a 5 panel wood door. The entry walls are vertical beadboard. Another 5 panel wood door leads into the main room of the building. The interior of the main body has wallboard on the walls. The ceiling has tiles and curves to the walls at the north and south sides. There are no blackboards left and no wainscot. Fixtures and wiring suggest electricity.

This school was built in 1912 and operated until 1958.
