NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Strahon SchoolSITS# 32 GV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a wood foundation. It was moved to this farm site for use as a shop/garage. The gable roof of the school and the shed roof of the entry are covered with metal sheeting. The chimney is gone and the soffits are closed. There building measures 34 feet north to south and 20 feet east to west.

There is a wide trim board on the wall under the soffits on all the peak ends. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. On the south wall of the building the wall has been opened up and a side sliding entry door was installed to give access to the interior. The north entry has a 5 panel wood door leading into what was a coat room. There is a wall to cut the entry in half. There are two doors leading from the entry into the main body of the school, both 5 panel wood doors. On the west wall of the school there are three shuttered, double hung, two over two, windows with intact glass. Three more double hung, two over two, windows are on the east wall have glass intact and are not shuttered. The walls in the building are lathe and plaster with beadboard wainscot. The ceiling is lathe and plaster with much of it falling in. The floor is hardwood. Light fixtures and wiring suggest electricity.

This school was built in 1909 and operated in the same location until 1958.
