**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Carew Harding SchoolSITS# 32 GV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The building was moved to the current location to be used for storage. The gable roof is covered with asphalt shingles on the south side and corrugated tin on the north side. The chimney is gone. The building measures 24 feet north to south and 20 feet east to west.

There is a wide trim board at the top of the wall under the soffits on the peak ends. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. There are two shuttered windows on the south side, two shuttered windows either side of a 5 panel locked door on the east side, another 5 panel entry door is at the north side of the west wall. On the north wall there is a shuttered window to the left of an overhead door, installed to give access for storage. Some of the double hung, two over two, windows have glass and are seen on the inside of the building. The ceiling and walls are covered with beadboard and there is vertical beadboard wainscot. The floor is tongue and groove hardwood. Light fixtures on the ceiling suggest electricity was present at some point.

This school was built in 1915 and operated until 1943.
