**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Highland Township SchoolSITS# 32 HT**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room school with awesome windows! The building measures 28 feet east to west and 22 feet north to south. A flag pole stands off the southeast corner of the school. The building has asphalt shingles with a concrete block chimney at the west end of the roof. Metal ridge cap finishes the top of the roof. There is a wide trim board under the roof overhang at the peak ends and the soffits along the north and south sides of the roof are open. The school has 6 inch lap siding with 6 inch corner trim boards. Electric wires run from a pole at the road to the school building and wires can be seen on the south wall. At the entry there is a falling down wood porch with metal hand rails. There is also an outdoor light high above the door. The entry door is a tired, 5 horizontal panel wood door. To either side of the door are double hung multipane windows with about 1/2 of the glass intact. Stepping into the school there is an entry area with a coat room to the left and a stairway to the right leading to the basement. The basement has a concrete floor with two windows to the south and another west. Flooring in the school is tongue and groove hardwood. There are 5, large, multipan windows on the south wall, about half of the glass is gone. Blackboards are on the north and west walls. Wainscoting is on all four walls. The walls in the school are lathe and plaster. There are ceiling tiles with a few break loose. Four light fixtures hang in the school.
