**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Odessa School #1SITS# 32 HT**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school that measured 26 feet east and west and 22 feet north to south with a 8 foot by 10 foot entry on the east side. The school has shakes on the roof of the school and entry. There is a stove pipe chimney at the west end of the south facing slope of the roof. The building has a wide trim board under the overhang on the peaked ends and the soffit on the north and south side is open. 6 inch lap siding covers the school with 6 inch corner trim boards. The windows on the south wall were all replaced and they are much smaller slidin windows. There is one 6 pane, double hung, window in the entry that looks to be original. Two more multipane double hung windows are at either side of the entry on the east end of the building. Electrical wire can be see running to the east end of the school. There is a disintegrating wood porch to the entry. The entry door is a 5 horizontal panel door with a metal door knob. The entry and school have wainscoting on lathe and plaster walls. Blackboards are on the north wall and either side of the chimney pip on the west wall. There is small furnace at the west end. The floor is narrow hardwood.
