Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data

Field Code Northwest Township SchoolSITS# 32 KD**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school that might be in the original location. This roof of the school is metal sheeting. The chimney is new, made of concrete with an interior pipe. The siding is 6 inch lap with fresh paint on three of the four sides. The windows on the east side have shutters over them and on the north side of the building there is evidence of two more windows, boarded up today. The corners have 4 inch wood trim. There are wide trim boards under the roof at the soffit. One window, covered with plywood, is at the south end of the north side. On the south wall there was an attempt to cover a small opening that was most likely the fuel door. The step for the building is rickety wood. Stepping into the entry the first thing I saw was a cooler and the second was a sign on the school door asking that it be kept closed. The building is used as a hunting cabin as evidenced by beds, cooking utensils and lots of other stuff. The floor in this building is hard wood tongue and groove with lathe and plaster for walls and ceiling in the entry. The walls in the main body of the school are all wall board with no evidence of windows that used to be on the north wall. Wainscoting runs around the entire room. There is a blackboard running most of the length of the west wall. A wood stove sits along the north wall along with a pile of wood. There is a kerosene lamp on the table for light. Old wiring on the outside school indicates that electricity was present at some point. School records indicate consolidation and closing of this school in 1957.
