Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Pamona View #2SITS# 32 LM**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a wood framed one room prairie school on concrete pillars. The school was moved to this location prior to 1982. It is a beautifully restored and cared for building. The school was built in 1912. The roof, hip on the main body and gable on the entry, is covered with asphalt shingles and there is a beautiful bell tower above the entry with a bell inside. The flagpole is at the tip of the cupola roof. There is not a chimney. The soffits are closed with original beadboard. The school measures 36 feet north to south and 24 feet east to west with the entry measuring 8 feet east to west by 10 feet north to south.

There is a wide header running under the eaves on all four sides of the main body of the school and also a header under the eaves of the entry. The siding is vinyl siding, put on after all the rotting wood lap siding was removed. Corners are 4 inch vinyl trim. The entry door is glass and 2 panel wood with a half moon transom window above it. There are two smaller windows in the entry, one north and the other south. A double hung window faces south from the coatroom. One small, fixed pane window can be seen high on the south end of the west wall. Two large double hung windows face north and 5 more face east out of the main school room. Most of the old glass of the large windows was replaced and windows were rebuilt to the old dimensions. The entry is a small room leading into a coat room that spans the entire south side of the school. They used to have two bathrooms in this part of the building, removed to have open space for display of school artifacts. The flooring in the building narrow hardwood beautifully finished. The walls and ceiling in the school are sheet rock with original wainscoting. The ceiling is high and there is a trim board running around all the walls about 2 feet down. Blackboards are on the west wall and the south wall of the main body of the school. Heat was coal. There are light fixtures and wiring giving evidence of electricity.

The school is furnished and really lovely.
