**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Norden Township SchoolSITS# 32 LM**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a poured concrete foundation. The gable roof is partially covered with asphalt shingles over wood planking. Metal capping with finials can be see at the peak of this roof that is sagging in the middle. There is a red brick chimney at the south end on the west slope and the chimney is partially covered with stucco or concrete. The soffits are closed. Some of the top bricks are missing. The entry roof is partially covered with asphalt shingles. The building measures 25 1/2 feet north to southe and 22 1/2 feet east to west with the entry being 8 feet by 10 feet.

The siding on the building is stucco over wood. Some of the stucco is falling away at the bottom of the school showing the original siding. Inside the entry there is the original 6 inch wood lap siding and it is not covered with stucco. The entry door is missing and there is a 5 panel wood door giving access to the main body of the school. The entry as well as the main body of the school are full of junk so didn't go into this one.

There is a window on the east wall of the entry, framing but no glass. There was also a bank of 5 windows on the east side, the windows were 6 paned double hung, today there is some glass and a lot of farming remaining. Remnants of window shades hang from the top of the window frames. The walls are covered with composite wallboard, the ceiling is gone. Could not see the floor. There was electricity present as noted by electric wires on the north side. A blackboard remained on the north wall.
