Page 3

SITS #32LMX

The site consists of a single structure which is quite unique in design for rural North Dakota. It has a hip bell cast roof. The porch or entryway has a gable bell cast roof and the bell tower has a bell cast roof. The structure has windows on all four sides, is wood shake shingled and has a brick chimney. A hand pump is visible in the front yard. It is identified as a one room school house based on the sign over the door "Duck University". It is in very good condition and will not be impacted by the rural waterline project. Future projects which may be destructive should be preceded by additional investigation and probably should be rerouted to avoid this building. It is quite likely eligible for the National Register of Historic Places.

View to north over Duck University (roll #DRW-1, exposure #20).
