**PAGE 3—Feature Data**Field Code German Township SchoolSITS# 32 LO**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a simple one room prairie school sitting on a concrete foundation. The roof is almost bare wood sheathing with some wood shakes hanging on in places. The peak of the roof has a metal roof cap with ball finials at either end. The roof is in tough shape with metal corner trim on a couple of the corner peaks, many missing on other seams. There is no chimney. The eaves have open soffits.

There are remanats of headers running around the school just under the eaves. The siding is 4 inch wood lap with no paint left. The corners are finished with metal corner trim. At the south end of the building the remains of the entry roof are lying on the ground, it is easy to see where it was attached to the school above the door opening. The door is missing. The windows on the east side are all gone, some framing can be see either leaning against the window openings or hanging from the top. Another opening near the south end of the east shows no remants of windows, same for another opening on the south end of the west wall. The walls and ceiling are nearly gone, some lathe and plaster is clinging to a few spots. Light fixtures pieces indicate electricity was present at some time in the past. There is a blackboard on the north wall and signs of one on the west wall at some point.
