**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Star Township SchoolSITS# 32 MH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on concrete pillars. It was moved to this location, most likely because of the flooding that took place in this river valley. The hip roof of this building is partially covered with wood shakes with metal capping at the peak and hips. There is a red brick chimney on the south facing slope of the roof. The soffits are open. This building measures 32 feet north to south and 18 feet east to west.

There siding is 6 inch wood lap with 6 inch wood corner trim. An open, wood sided porch leads up to the 4 panel wood door on the south side of the school. Wood steps are pretty rotted and rickety. There is a transom above the door and two small, double hung doors to either side. There is a bank of 6 windows on the west wall and they are all shuttered. Much of the glass is intact. The floor is tongue and groove hardwood. There is a small foyer inside the entry door with a coat room to the right. The interior of the school room has lathe and plaster on the ceiling and the walls, some of the ceiling is falling away. Wainscot finishes the bottom 1/3. There is a curling blackboard on the east wall. Along the east wall is a stairway going to nowhere suggesting that this school was once sitting on a basement. Electric wires and fixtures suggest electricity.
