**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Lake George Township SchoolSITS# 32 MH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete foundation. The roof is covered with asphalt shingles with metal capping on the hips as well as at the top of the gable entry. Finials are at the ends of the top capping. The soffits are open. There is no chimney.

The building is in a fenced area and there were dogs so we did not approach the school. There is a concrete step for entry to the school with pipe rails. The door is a wood plank door with a transom above, covered with wood. There are several windows, on the east side there are two, multipane, double hung windows near the south side of that wall. The entry has one multipane, double hung windows on the east side. There is a bank of 5 multipane, double hung windows on the south side, 4 are shuttered. Three more shuttered windows are seen on the west wall. Much of the glass is missing. The gable roof at the entry extends over the door a few feet and there are three decorative supports located at either side and in the middle.

Electric conduit and a meter suggest the presence of electricity.
