NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Lake Hester Township SchoolSITS# 32 MH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a poured concrete foundation. The modified hip roof of the school and the half hip roof of the entry are covered with asphalt shingles. There is no chimney. The roof line is different in that it is a hip at the top with a mansard look. At the front of the school, south side there is a half hip roof on the entry and about the entry there is a decorative gable peak with a slope toward the entry. The soffits are closed. This building measures 24 feet north to south and 26 feet east to west with a entry measuring 6 feet by 10 feet.

A wide trim board runs under the soffits on all sides of the school with the remainder of the siding 6 inch wood lap with 6 inch corner trim. There are no windows on the west or north sides. Three double hung, 2 over 2) windows are on the east side with one shuttered. Much of the glass is missing. On the south side there is one shuttered window to the west side of the entry and another shuttered window on the south wall of the entry. A concrete step leads to the solid core locked entry door. The walls and ceiling of the interior are wall board with wainscot. The floor is tongue and groove hard wood. There are no blackboards. There is a wood burning furnace on the north wall but no chimney. There is conduit outside and light fixtures inside suggesting electricity is present.

A sign on the south side of the entry says it is a warming hut for snowmobilers.
